July 11, 2019 -- Library Workshop for BNURS 360 A: Critical Reading and Information Literacy in Nursing, Dr. Sunita Iyer

See the “Library Resources Workshop on July 11 (not an assignment)” link in your Canvas course (http://canvas.uw.edu/) in the Modules area, (between Module 1 and Module 2):

If you have any questions or need help with your research, please contact the Bothell Campus Library or Julie:
- Call the library at (425) 352-5340 or try our Ask Us a Question services at https://guides.lib.uw.edu/bothell/askus
- Julie Planchon Wolf, Research & Instruction/Nursing & Health Studies Librarian, Email: jspw@uw.edu, Phone: (425) 352-3452, Office: LB1-210C

The library web guide is located online at http://guides.lib.uw.edu/bothell/bnurs360460si

To navigate this page, click on the various links including Welcome, Library Homework Assignments, Library Workshop, wk 3, APA Citing & Writing Guides, and (BNURS 460 Resources for next quarter).
I am sorry about the small font size on this handout -- if you view the directions online, you can increase the text size for easier readability.

Below is the Library Workshop, wk 3 (360) page that has links to the online resources we will be searching in to find resources for Literature Search Workshop, Annotated Bibliography, and Literature Review Matrix assignments. APA citation style guides are also included.

Library Workshop in week 3

The web resources to be used for your class assignment are linked below. Please don’t print these out in advance of the workshop, as Julie will provide copies in class.

Today you will work to locate sources on a specific topic for your Literature Search Workshop, Annotated Bibliography, and Literature Review Matrix assignments.

1. Intro to the New Nursing Students Orientation Guide and handout.
   - 2018-19 Orientation Guide handout in docx and pdf formats

2. Review the three assignments taken from Canvas listed below:

   Literature Search Workshop (Due Sun, July 14, 10 points)

   During Week Three in-class, you will have the opportunity to work with Julie Planchon Wolf from Bothell Campus Library.

   In the course of her workshop, you will team up with your group and start looking into resources to support answering the question you developed via Research Question Development.

   Your findings from this workshop will serve as the starting point for and become part of your Literature Review Matrix and Annotated Bibliography.

   The grading for this workshop will include your preparation, participation, and preliminary findings:
   - You have already completed your Library Assignments
   - You have already completed your Research Question assignment
   - You are present, actively participating, and contributing to your group
You submit (to this assignment item) a document of what literature you found, what the relevance is to your research question (support, dissent, neutral), validity, how it may change the question you are asking or not, what biases or ethical considerations may be present, and any other notes about how this would support your understanding of your topic. This document will be the ‘draft’ of your Literature Review and Annotated Bibliography, so consider also utilizing those formats in this submission.

Since this is a group submission that everyone will be contributing to, you may also submit a Google Doc link to the living document that you are all editing.

**Annotated Bibliography (Due Sun, Aug. 11, 10 points)**

This is an APA-format paper that will utilize 3 (three) sources per student in the group to address your Research Question in the form of an Annotated Bibliography.

This paper will be approximately 5 pages long and include:

- a findings section in which you describe preliminary conclusions you can draw from this initial review,
- an implications section in which you explore possibilities for the more focused question(s) you will ask in 460 (Part Two)
- Not every citation included in your Literature Review Matrix will be discussed here, just the most contributory. However, all of the sources used in this paper need to be included in your Literature Review Matrix.

More resources and guidance will be provided as we progress through the quarter.

- Here is some information to prepare you for this activity: https://academicguides.waldenu.edu/writingcenter/assignments/annotatedbibliographies

**Literature Review Matrix (Due Sun, Aug. 18, 10 points)**

Each group will produce a Literature Review Matrix with a total of six (6) to eight (8) sources per group member. So this submission may possibly include 35 to 40 sources that are included that address the Research Question developed (and possibly edited) over the course of the quarter.

In this Matrix students will compile the studies they have found related to their Research Question and organize them for submission. There are a number of formats out there, and I will provide some samples/templates along the way. Here are a few resources to begin thinking about what information you will need to gather and organize.

- https://academicguides.waldenu.edu/writingcenter/assignments/literaturereview (Links to an external site.)
- https://guides.library.vcu.edu/lit-review

Are we clear on the types of resources you need to start looking for? What questions do you/we have?

(Optional) Please see the instructions below both the CINAHL and PubMed areas for how to limit to various types of research articles.

3. Questions/comments about the Canvas assignment for "Interlibrary Loan Account Setup" homework? Any questions about the UW Libraries Interlibrary Loan services? Suggestions for improvements to this assignment?
4. Questions/comments about the CINAHL Quiz in Canvas, titled "Searching CINAHL - Scholarly Resources & Full Text"? What questions do you have about CINAHL?

- **CINAHL - UW Restricted.** How-to Guides from the UWB Campus Library (pdf), tutorials, and the UW HSL CINAHL Help Guide
- (Optional) Julie will search for medication errors and long term care (or something else) and discuss as a large group the search results. Look at the article title, date, journal name, publication type, abstracts, and subjects to see if relevant to topic. We will skim to try to locate more search words to revise your search to get different results in CINAHL.

**Optional CINAHL Limits and Search Strategies:**

- Publication Type – Limit results to source types such as Clinical Trial, Evidence-Based Care Sheet, Interview, Meta Analysis, Meta Synthesis, Nursing Diagnoses, Nursing Interventions, Randomized Controlled Trial, Research, Review, Statistics, Systematic Review, or Tables/Charts. Scroll down in the box to see the full list of types. You can select multiple items either by holding down the control key (Ctrl) on a PC, or the Apple button on a Mac computer.
- Clinical Queries – (What are they? Search strategies used, Help Sheet doc) – Can limit to Therapy, Prognosis, Review, Qualitative, and Causation (Etiology). See the Help Sheet for definitions of High Sensitivity, High Specificity, and Best Balance.
  - **Quantitative article types:** Clinical Trial, Randomized Controlled Trial
  - **Qualitative article types:** Meta Synthesis, Qualitative (in Clinical Queries)
  - **Review article types:** Meta Analysis, Review, Systematic Review
- If needed, you can type the word qualitative or quantitative in your search. (Optional UW HSL guide for "Finding Qualitative Research Articles")
  - native americans and diabetes and qualitative
  - aged and female and chronic pain and quantitative
  - Can also add the CINAHL Heading of "Qualitative Studies" to your search.

5. Questions/comments about the PubMed Quiz in Canvas, titled "Searching PubMed (MedLine) for Research Articles"? What questions do you have about PubMed?

- **PubMed - Publicly accessible, but some full text is UW restricted.** Search for medicine, health, and nursing article citations. The National Library of Medicine’s search service to over 29 million citations in Medline and related databases. (UW Health Sciences Library How-to Guide.) (PubMed Tutorials and Quick Tours.) (PubMed for Nurses-Video Tutorial.) (MeSH On Demand tool.)
- (Optional) Julie will search for medication errors long term care (or something else) and discuss as a large group the search results.
Optional PubMed Filters and Search Strategies:

- Filter by Article Types: After you have completed a search, you can filter by a variety of article types including the sample below, and then and click on the "Show" button. (Ask your professor which article types are acceptable to use.)
  - **Quantitative article types:** Clinical Trial, Controlled Clinical Trial, Multicenter Study, Pragmatic Clinical Trial, Randomized Controlled Trial, and Validation Study
  - **Review article types:** Meta-Analysis, Review, and Systematic Review
- If needed, you type the word qualitative or quantitative in your search. (Optional UW HSL guide for "Finding Qualitative Research Articles")
  - native americans diabetes qualitative
  - aged female chronic pain quantitative
- Search for qualitative articles with MeSH Terms, by adding them to your search words. (List online.)
  - "Qualitative Research"
  - "Interviews as Topic"
  - "Focus Groups"
  - "Nursing Methodology Research"

6. APA Citing, UW Libraries Search, and Evaluating Sources Pages:

- UWB Writing & Communication Center: APA Formatting guide, the Campus Library APA Style Guides for citing sources, and Julie’s APA citation formats page.
- Use the UW Libraries Search to locate full text articles online and print formats. Books, journals, films and other formats of resources are also available. Some items are **UW Restricted.** (UW Libraries Search Help Guide.) Directions to use the catalog to locate an article.
- Video Tutorial: What is a scholarly journal article? The Evaluating Sources Guide from the Bothell Campus Library

7. (Optional) Mining Citations -- Small Group Activity:

1. Tutorial page for Mining CINAHL Results for New Search Words/Phrases.
2. As you search think about what trends you see about your topic in the literature.
3. Mine the article titles, abstracts, and subject headings for new words to help you refine your search results.
4. Also, use the words to create new search phrases to see what else is available on your topic.
